

CHP DOSIMETRY PRICE LIST

We save our clients hundreds of dollars a year while providing excellent customer service. We offer the same NVLAP Accredited (Code 100555-0) radiation badge service as our competitors.

CHP offers badges to meet any needs. For most customers we recommend the **Instadose Plus** badge. This badge can be read as often as you like, allowing you to monitor your exposure more closely. Even better, no mailing is required, saving you time and money. For those who prefer traditional badge exchange, we recommend the **Apex Badge**, which is our least expensive. If you need to see 1 mrem of dose or are measuring neutrons, we suggest our most sensitive badge, the **Genesis Ultra BP**.

Prices listed are for annual service
